(a) Indexes of weighted average minimum weekly rates payable for a full week's work (excluding overtime) and index number of wage rates, as prescribed in awards, determinations, and agreements. The indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries". Consequently awards, etc., relating mainly to salary earners are excluded. Rural industries are also excluded. Figures are subject to revision.

(b) The money amounts shown should not be regarded as actual current averages, but as an index of changes expressed in money terms.

Total wages for adult males and adult females were to be increased by \$1 a week from the same date.

(c) Rates declared subsequent to a Commonwealth basic wage inquiry.

Female rates: Since December 1950, female rates have been 75% of the corresponding male rates: previously they have varied according to the award or determination under which they were payable.

NOTE: Up to August 1953, basic wage rates under Wages Boards' Determinations generally followed those fixed by the Commonwealth Court of Conciliation and Arbitration. In September 1953, automatic quarterly adjustments of the basic wage were discontinued by the Commonwealth Court, but were continued for State Wages Boards' Determinations until August 1956.
